PROJECTS

Music App

https://miao0007.github.io/music-app/

A music application that plays a song based upon responses to questions.

- Utilizes MusixMatch, Tenor, and Youtube API for displaying user options and quiz results.
- Retrieves the data in a JSON format and dynamically updates the HTML & CSS via JavaScript and jQuery to implement the quiz process

Pokemon Love Calculator

Heroku: https://powerful-mountain-92684.herokuapp.com/

About Me

Aspiring Full Stack Developer currently enrolled in the University of Adelaide Coding Boot Camp with a passion for making responsive, user-friendly websites.

I am well-organized and collaborative with a strong ethic and a passion for continuous learning. I am looking forward to the opportunity to apply my skills as a front-end or full-stack web developer.

Github:

https://github.com/miao0007/Professor-Oak-s-Pokemon-Love-Calculator

A Pokemon fansite which is to search the compatibility of your name with that of a potential partner.
